

Hazardous Weather Briefing

**National Weather Service
Little Rock, Arkansas**

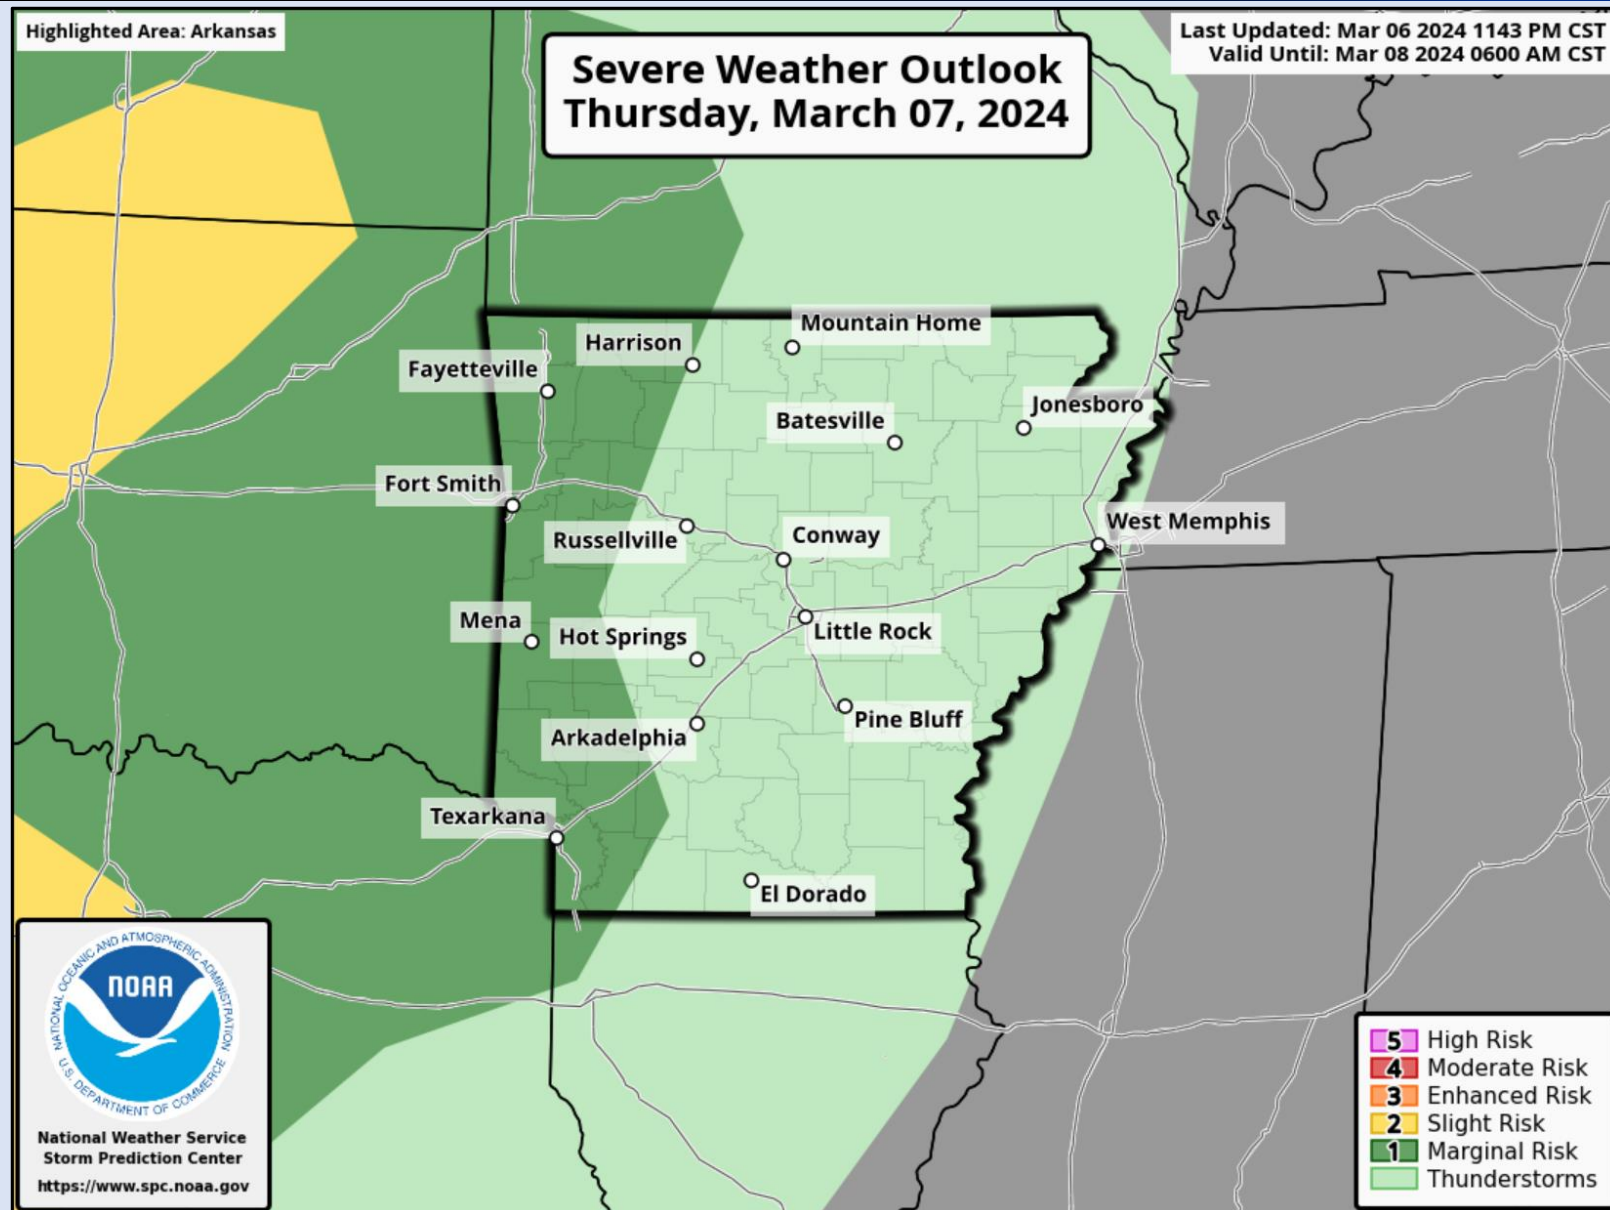

**March 7, 2024
6:00 AM CST**

- **A storm system arriving from the southern Plains will bring widespread showers and thunderstorms to Arkansas today through Friday night.**
- **Isolated severe storms could occur over western Arkansas today. Large hail would be the main concern.**
- **Isolated to scattered severe storms could occur across mainly the southern half of Arkansas on Friday. The main concern will be large hail and damaging winds, however a tornado or two can not be ruled out. The environment will be most unstable (warm/moist) toward the Gulf Coast, and that is where damaging winds/a few tornadoes are most favored.**
- **The forecast calls for one to two inches of rain across much of the state, with locally heavier amounts possible in the north. Any flash flooding should be localized.**
- **Sub-freezing temperatures possible Sunday morning over portions of Arkansas.**
